Basic needs. Simplified care. Exceptional outcomes.

The acceptable number of adverse events in your facility is zero. With the right technologies and processes in place, potential adverse events often can be prevented.

Our InTouch bed delivers intuitive, advanced technology and backs it with hospital programs and processes that enable you to minimize the risk of never events while providing a higher quality of care safely, conveniently, and consistently.

All InTouch beds are part of Stryker’s Connected Hospital Service which can link via wire or wirelessly to your hospital’s choice of information systems.*

Intuitive controls are located on all four sides with advanced caregiver controls on the footboard, in an ergonomic BackSmart position, away from the patient’s reach and bedside clutter.

One touch electric brakes help to prevent unnecessary bending and stretching required by traditional brakes.

Chaperone Bed Exit System with Zone Control tracks the patient’s position and alerts the caregiver of any changes through a local or remote alarm. The caregiver can choose a spoken patient command in place of an alarm.

iBed Awareness monitors local bed status information, alerting changes to preset positions visually, audibly or remotely.

Protocol reminders help organize and improve care efficiencies with hospital best practices.

Spoken language translations help improve communication with Limited English Proficiency (LEP) patients.

On-board sound feature helps to create a soothing background for patients.

Support surfaces can be changed as therapies dictate, and our Isolibrium support surface can be directly controlled by the touch screen.

• Smart maintenance screen
• Event manager screen
• Smart scale
• BackSmart pivot in-bed patient positioning
• Chaperone Bed Exit System
• Electric brake with mechanical back-up
• CPR foot pedal and CPR-ready headboard
• Full functionality battery back-up
• Enhanced cardiac chair
• One-handed siderail release
• Siderail-storable patient control pendant
• Radiolucent litter top
• Patient lock-out controls
• Integrated pump holder
• Single 110-volt auxiliary outlet
• LED nightlight
• DC actuators
• USB port
• Three-zone bed exit alarm
• One touch HOB 30-degree button
• Traction equipment socket
• Quick-reference guide
• Foley bag hooks

Specifications
Model number 2131 (2141 Zoom)
Overall length 90" (228.6 cm)
Overall width
Siderails up 42" (106.7 cm)
Siderails down 40.5" (102.9 cm)
Weight capacity 550 lb. (249 kg)
Height range (to litter top)
High 33" (83.8 cm)
Low (standard with 6" casters) 16" (40.6 cm)

Litter positioning
Backrest 0°–70°
Knee gatch 0°–15°
Trend./reverse trend. ±12°

Patient surface 35” x 84” (89 x 213 cm)
Caster diameter 5.5" (14 cm)

Optional features
• iBed Awareness
• Protocol Reminders
• iBed Serial Port
• iBed Wireless
• Calculator
• Converter
• Translator
• Audio
• Documentation
