The acceptable number of adverse events in your facility is zero. With the right technologies and processes in place, potential adverse events often can be predicted and prevented.

Our commitment to prevention includes both patients and caregivers. Our exclusive BackSmart design makes tasks safer and easier. Controls are more accessible. Bending and pulling motions are minimized. Exclusive, two position siderails and StayPut technology help to reduce the risk of stress injuries.

All S3 beds are part of the our Connected Hospital which can link via wire or wirelessly to your hospital’s choice of information systems.

Siderails are BackSmart designed with one-hand operation and an intermediate position for patient assistance during bed entry and exit.

One-touch scale allows accurate, repeatable readings with the patient or bed in any position.

iBed Awareness monitors local bed status information, alerting changes to preset positions visually, audibly or remotely.

Open architecture platform gives you clinical and financial flexibility to choose any support surface for the bed.

Exclusive StayPut Technology allows patient’s proximal location to remain essentially unchanged when the head of bed is raised, reducing the need for patient repositioning while keeping patients close to bedside belongings.

S3 Signature Series bed can be ordered with customized colors, wood laminates, and insignia, logo or award images to support the identity of your healthcare organization.

Care should be taken when selecting a support surface to ensure the bed mattress combination to HBSW guidelines and IEC specifications for patient entrapment. See bed operations manual for mattress specifications.
**Standard features**

- Centrally-located brake pedal
- 4-wheel, steel brake with swivel lock system
- 6” (15 cm) casters
- One-touch 30-degree head of bed angle and lock
- One-hand, intermediate siderails
- StayPut bed frame design
- Open architecture – flat litter deck
- Fowler angle gauge
- Four IV pole and traction equipment socks
- Four foley bag hooks
- Steer control
- Integrated pump holder
- Foot prop rod
- Downward motion interrupt
- CPR release and removable headboard
- Dual pedestal lift design
- Three-sided bed motion controls
- One-button cardiac chair position
- Foot end lock-out controls
- Foot end digital trend. and Fowler angle display
- Trend./reverse trend. controls
- Neutral accent panels
- Night light
- iBed upgradable
- DC motor
